GUIDELINES ON THESIS / DISSERTATION FORMAT FOR POSTGRADUATE PROGRAMMES

2017

**INSTITUTE OF GRADUATE STUDIES
UNIVERSITI TEKNOLOGI MARA**

**GUIDELINES ON THESIS/DISSERTATION
FORMAT**

2017

LIST OF EDITORS

The editorial members of the first 2013 edition of *The Guidelines on Thesis/Dissertation Format for Post Graduate* are:

Siti Halijah Shariff, *PhD*
Zuhaina Zakaria, *PhD*
Raja Munirah Raja Mustapha, *PhD*
Kartini Kamaruddin, *PhD*
Kalavathy Ramasamy, *PhD*
Kalsom Salleh, *PhD*
Sharifah Khadijah Syed Agil, *PhD*
Mohammad Nawawi Seroji, *PhD*
Maria Justine, *PhD*
Sharifah Aminah Syed Mohamad, *PhD*
Mohd Hezri Fazalul Rahiman, *PhD*
Siti Farhana Zakaria, *PhD*
Noorzan Mohd Nor, *PhD*

This 2017 edition is also supported by the MS Word Template developed by:

Mohd Zuli Jaafar, *PhD*

APPENDIX Q : SAMPLE OF REFERENCES 46

PREAMBLE

This handbook on the Guidelines for Thesis/Dissertation Format of Graduate Programmes has been prepared by the Institute of Graduate Studies (IGS) of Universiti Teknologi MARA (UiTM) to assist students in preparing their thesis/dissertation to adhere to UiTM Thesis/Dissertation Style.

A thesis/dissertation has to be written in accordance to UiTM Thesis/Dissertation Style which was initially developed based on the 6th Edition of American Psychological Association (APA) with its citation and reference styles can also follow the Institute of Electrical and Electronics Engineers (IEEE) or the Harvard Style. In this 2017 edition handbook, a few minor modifications to the styles and formats are made in line with the developed UiTM MS Word Thesis Template to assist the students in preparing the final thesis.

The citation and reference style are also expanded to Chicago and House Style as required by a few Faculties. The chosen style should be adhered to consistently throughout the thesis.

The following are the thesis/dissertation formatting and submission processes guidelines that must be taken into consideration:

- Technical Specification
- Layout and Arrangement of Contents
- Body of Thesis/Dissertation
- Reference Materials
- Writing Conventions
- Quality and Integrity of the Thesis/Dissertation
- Appendices

1. TECHNICAL SPECIFICATION

1.1 Length of Thesis/Dissertation

Total number of words for the Doctoral/Master's thesis is based on the MQA programme standard and listed in APPENDIX A for each faculty. The total number of words does not include endnotes, quotations, appendixes, tables, and diagrams.

1.2 Organizational Structure and Format

Students are to adhere to the following organizational structure and format:

i. Font

Times New Roman typeface should be used. Title should be set in upper case, bold, 14-font size. Block quotations and footnotes should be set in 10-font size. The abstract, acknowledgement, and the main body of the thesis/dissertation should be set in 12-font size.

ii. Heading and Subheadings

1.1 Main Heading

Flushed left, bold, Title Case/Capitalize Each Word, font 12.

Example:

1.1 Background of Study

1.1.1 Sub-Heading

Flushed left, bold, Title Case/Capitalize Each Word, font 12.

Example:

1.1.1 Role of an Effective Leader

1.1.1.1 Sub Sub-Heading

Flushed left, bold, italics, Title Case/Capitalize Each Word, italic, font 12.

Example:

1.1.1.1 Leader as a Facilitator

Note: Limit to 4 levels of heading if possible in the text.

iii. Margins (Body of the Thesis)

A margin is the amount of blank space from the edge of the page to any print, be it a heading, page number, figure, or text. The finished manuscript must have the margins indicated below. Margin requirements extend to tables, figures, and material in the appendix. A proper setting of the printer is required to ensure the final manuscript is printed as specified. You may want to use a ruler to measure the actual margins since interfaces between computers and printers can vary the measurement of the margins. Note that all margins must be specified as follows:

Left margin	3.8 cm or 1.5 inches
Right margin	2.5 cm or 1.0 inch
Top margin	2.5 cm or 1.0 inch
Bottom margin	2.5 cm or 1.0 inch

iv. Paragraphs and Line Spacing

The first line of all paragraphs should be indented one tab key from the left-hand margin. The main body text should be justified. In the main body, use 1.5-line spacing. Leave a 1.5 line spacing before a heading. Do not leave a line between paragraphs.

v. Pagination

Page numbers should be placed at the bottom of the page and centred. Each page in the thesis/dissertation, from the body onward, should be numbered in consecutive order. This includes the text, references, and appendices. Preliminary pages carry lowercase Roman numerals (i, ii, iii, etc.). The first page of Chapter One marks the starting of pagination in Arabic numerals (1, 2, 3, etc.)

vi. Layout and Arrangement of Contents

For the following, refer to the appendices:

- Title Page (APPENDIX D)
- Confirmation by Panel of Examiners (APPENDIX E)
- Author’s Declaration (APPENDIX F)
- Abstract (APPENDIX G)
- Acknowledgement (APPENDIX H)
- Table of Contents (APPENDIX I)
- List of Tables (APPENDIX J)
- List of Figures (APPENDIX K)
- List of Plates (APPENDIX L)
- List of Symbols, (APPENDIX M)
- List of Abbreviations (APPENDIX N)
- List of Nomenclatures (APPENDIX O)

vii. Tables, Figures and Plates

a) Figure (refer to APPENDIX P, page 43).

Figures include maps, charts, diagrams, drawings, etc. Each of these categories is numbered according to chapters using Arabic numerals throughout the thesis.

b) Table (refer to APPENDIX P, page 44).

Tables are numbered by chapters using Arabic numerals.

c) Plate (refer to APPENDIX P, page 44).

Plates are printed images, photos and are numbered by chapters using Arabic numerals.

viii. Equations and Formulae

Every equation should be centred and numbered continuously, according to the chapters and in parentheses “()” aligned to the right. Font size of 12. (*Note:* In MS Word, insert a table with two columns and one row to add a new equation to the thesis. Refer to APPENDIX P page 44. Do not display the outline of the table.).

Refer to Writing Conventions (Section 5).

ix. Suggested Body of Thesis/Dissertation

The body of the thesis/dissertation is made up of a number of chapters. The major chapters of the thesis/dissertation should include but not limited to the following:

Science and Technology	Social Science and Business Management
Introduction Literature Review Research Methodology Results Discussion Conclusions and Recommendations	Introduction Literature Review Research Methodology Findings & Analysis Discussion Conclusions and Recommendations

1.3 Citation and Referencing Styles

It is recommended that citation and referencing for thesis/dissertation follow either the APA, IEEE, Harvard, Chicago or House style. The chosen citation and referencing styles should be used consistently throughout the thesis/dissertation.

1.4 Process of Thesis/Dissertation Submission Binding for Submission (Viva-Voce)

i. Research Programmes

Five (5) hard copies for Masters and Doctoral thesis submission should be spiral-bound. The full title, the name of the author, the name of the degree, and the year of submission should be typed on the title page. (Refer to APPENDIX B and APPENDIX D)

ii. Coursework Programmes

Three (3) hard copies for Masters and Doctoral dissertation/project submission should be spiral-bound. The full title, the name of the author, the name of the degree, month and the year of submission should be typed on the cover title page. (Refer to APPENDIX B and APPENDIX D)

1.5 Binding the Final Copy

For research programmes, once corrections have been endorsed by examiner(s) and approval letter for binding is issued, four (4) hardbound copies of thesis/dissertation together with two (2) soft copies in CD (PDF) format must be submitted to IGS. The same number of copies is applied to all languages required to be prepared for thesis written in other than English.

For coursework programmes, two (2) hardbound copies should be submitted to the Faculty together with two (2) soft copies in CD (PDF) format after corrections of dissertation/project have been endorsed by the examiner(s).

A Master's thesis/dissertation should be hardbound in dark blue colour, while a Doctoral thesis/dissertation should be hardbound in maroon colour. The final cover of the submitted copies must be lettered in gold.

1.6 Paper Quality

Quality plain white simile paper (80gm) of A4 size (210 x 297 mm) should be used for all copies of the thesis/dissertation. Text or illustrations should be printed on only one side of each sheet or as stipulated by the Faculty. Only original quality printed copies will be accepted.

1.7 Cover Spine and Front Cover

The following particulars should be lettered in gold (direction of text from head to foot), using 16-point font. Refer to APPENDIX C:

- Universiti Teknologi MARA
- Title of thesis/dissertation
- Full name of student as in NRIC/passport
- Degree acronym (refer to APPENDIX B)
- Month of final hardbound submission for binding and year of submission (e.g. July 2017)
- The full name of the Faculty

2. LAYOUT AND ARRANGEMENT OF CONTENTS

2.1 Title Page

This page should contain the following information. Refer to APPENDIX D:

- The name of the University is written in full, bold, uppercase and centred using 18-point font:
- The final title used must be the one approved by the panel of examiners. It should be centred, uppercase, bold and single-spaced using 18-point size.
- Name of the author must be uppercase and bold using 14-point size.
- The degree for which the thesis/dissertation is submitted is typed in title case using 14-point font. (e.g. Master of Science, Master of Education, Doctor of Philosophy in Education) as stated in the offer letter issued by UiTM. It should be indicated that the thesis/dissertation is being submitted for either partial fulfilment or in fulfilment of the requirements for that particular degree as shown below:

Thesis submitted in fulfilment
of the requirements for the degree of
Master of Science
(Electrical Engineering)

Faculty of Electrical Engineering

July 2017

OR

Dissertation submitted in partial fulfilment
of the requirements for the degree of
Master of Science
(Applied Biology)

Faculty of Applied Science

Jan 2017

- The faculty in which the student is registered is written in title case and bold using 14-point size.
- The combination of month and year of the final hardbound submission for binding is to be stated 2 cm below the name of the faculty, 14-point size and bold.

2.2 Confirmation by Panel of Examiners

The student is provided with a copy of the Confirmation by Panel of Examiners which names should be included in the preliminary page (ii). The page is signed by the current Dean of IGS. Refer to APPENDIX E.

2.3 Author's Declaration

The student should place this page before the abstract page, a signed author's declaration stating the material presented for examination is her/his own work or how far the work contained in the thesis/dissertation was the student's own work, and stating that the thesis/dissertation is not being submitted for any other academic award. Refer to APPENDIX F.

2.4 Abstract

The abstract should give a brief statement of the research problems, aims of the research, methodologies used, key findings in the context of the whole study, and implications of the study. It should not be less than 200 words (Master's degree) and 250 words (PhD degree) and must not exceed one page. The abstract should be typed in single spacing and placed immediately before the Acknowledgement. Refer to APPENDIX G.

2.5 Acknowledgement

A brief statement of appreciation in recognition of any special assistance rendered to the student during the period of research should be included. It should be typed in single spacing and should not exceed one page in length. Refer to APPENDIX H.

2.6 Table of Contents

Titles of chapters, headings, and subheadings must be listed in the Table of Contents and must be worded exactly as they appear in the body of the thesis/dissertation. All headings and sub-headings are numbered and to be justified to the left. Refer to APPENDIX I.

2.7 List of Tables, Figures and Plates

- i. Tables (refer to APPENDIX J)
- ii. Figures (refer to APPENDIX K)
- iii. Plates (refer to APPENDIX L)

The numbers and the captions must be listed in the order they appear in the text.

2.8 List of Symbols, Abbreviations and Nomenclatures

- i. List of Symbols (refer to APPENDIX M)
- ii. List of Abbreviations (refer to APPENDIX N)
- iii. List of Nomenclatures (refer to APPENDIX O)

These must appear after the lists of tables, figures and plates.

3. BODY OF THESIS/DISSERTATION

The text is made up of a number of chapters. The major chapters of the thesis/dissertation should include but not limited to the following:

3.1 Introduction

This section sets forth the rationale, significance, and objectives of the study. It includes background of the study, problem statement, research objectives, research questions, hypotheses to be tested (subject to discipline of study), significance of study, limitations, the scope of study and definitions of terms (subject to discipline of study).

3.2 Literature Review

This section includes a fully-referenced review and discussions of previous studies which are relevant to the research.

3.3 Research Methodology

This section gives a detailed description of the research methods and instruments/materials used. Research methods should include experimental design, the number of subjects, apparatus, etc.

3.4 Results/Data Analysis

This section provides the results and analysis of data. The results obtained can be presented as a series of figures, tables, etc., with descriptive texts and discussions.

3.5 Discussion

This section focuses on the results of the study in relation to the hypotheses or the research questions. It highlights the main findings, their significance and implications. The results should be interpreted in the light of what is already known and emphasis should be placed on what the results add to the subject area. Strengths and weaknesses of the results should be discussed.

3.6 Conclusions and Recommendations

This section highlights the contribution of the findings to new knowledge and applications. It should also discuss the limitations faced in carrying out the research and the recommendations for future research.

Students may make changes to the above structure of the thesis/dissertation according to discipline of study.

4. REFERENCE MATERIALS

4.1 References

The heading REFERENCES should be left aligned, bold, uppercase, 14-point size. This list must include all the references that students have cited in the text of the thesis/dissertation.

Students must use either the APA, IEEE, Harvard, Chicago or House style in writing their references. A thesis/dissertation should only use one citation style that is generally accepted according to discipline of study. The chosen citation style should be used consistently throughout the thesis/dissertation.

4.2 Appendices

This section may contain supplementary illustrative materials such as original data, questionnaires, formulas and quotations too long for inclusion in the text or not immediately essential to the understanding of the subject. A description of lengthy experimental methods or the list of names of participants may be included.

If the paper has only one appendix, it is labelled as APPENDIX (Uppercase, bold, centred, 12-point size). If it has more than one appendix, each is labelled with a capital letter such as APPENDIX A, APPENDIX B etc.

Point size for the title and the text should be 12. Text should be justified. If, for example, there is more than one appendix for APPENDIX A, then it will be titled APPENDIX A1, APPENDIX A2, etc.

4.3 Author's Profile

Students are required to include a page on their profiles with the following:

- A passport size photo.
- A short autobiography on academic achievements, working experience and professional career. It should be typed in 1.5 spacing.
- List of conferences and publications (if any)

5. WRITING CONVENTIONS

5.1 Math

- i. Variables are set in italic; vectors and matrices are usually boldface italic.
- ii. Remove commas around variables in text.
- iii. Always add a zero before decimals, but do not add after (e.g., 0.25).
- iv. Spell out units in text without quantities (e.g., where the noise is given in decibels).
- v. Numbers and units used as compound adjectives should be hyphenated only if needed for clarity (e.g., 10-kV voltage; 5-in-thick glass).
- vi. Use thin spaces (instead of a comma) between numbers in tens or hundreds of thousands (e.g., 60 000, 100 000, but 4000).
- vii. Use zeroth, first, second or ninety-ninth not 0th, 1st, 2nd or 99th in text.
- viii. Use the word "Equation (1)" at the start of a sentence only, but in text just use the number (e.g., "in (1)"), unless describing an equation (e.g., "refer to Darlington equation (1)"). Refer to APPENDIX P page 44.
- ix. The slash is used in place of the word "per" when it leads to the clarity of the sentence (e.g., "the ratio of 16 samples/s to 35 samples/s as compared to...")
- x. Use "indices" instead of "indexes" when referring to subscripts.
- xi. Plural variables have an "s".

5.2 Ellipsis

Ellipsis (...) may be used to show continuation in an expression (e.g., x_2, \dots, x_{16}). The type of mathematical expression will determine whether the ellipsis are on the baseline or centred.

5.3 Conditions

In displayed equations, there should be a comma or parentheses and a space between the main expression and the condition following it. For example,

- a. $X=yn^{-2}$, for all $n=3$
- b. $X=yn^{-2}$, $Vn=3$
- c. $X=yn^{-2}$, if $n=3-y^{-4}$
- d. $X=yn^{-2}$, y^3, \dots, m

5.4 Use of Period and Commas

Equations that conclude a sentence should end with a period. The only time punctuation is used to lead into an equation when the lead-in text is a complete sentence. Example:

where we had the following:

$$x=Y+Z.$$

or, where, i.e.,

$$x=Y+Z.$$

Commas appearing at the ends of equations are deleted unless they are critical to the punctuation of the sentence containing the equation.

5.5 Displayed Equations

Certain types of material in displayed equations are automatically italic. Some simple general rules apply. All variables are italic. (e.g., x , y , n). Function names and abbreviations are Roman (sin, cos, sinc, sinh), as are units or unit abbreviations (e.g., deg, Hz,) complete words (e.g., in, out), and abbreviations of words (e.g., max, min), or acronyms (e.g., SNR). Single letter superscripts and subscripts may be italic even if they are abbreviations, unless this leads to inconsistency between italic and roman characters for similar types of subscripts.

5.6 Direct Quotations

The quotation needs to be true to the original, quoted in the text to support argument.

Example:

Crompton (2004), confirmed that “*the real estate market consistently demonstrates that many people are willing to pay a larger amount for a property located close to parks and open space areas than for a home that does not offer this amenity,*”

6. QUALITY AND INTEGRITY OF THE THESIS/DISSERTATION

Students are reminded that consistency and accuracy of the submitted thesis/dissertation are important. Careful editing is required in order to ensure that the thesis/dissertation is free of errors before submission for thesis/dissertation examination.

6.1 Plagiarism

Plagiarising is strictly prohibited. Action will be taken in accordance to UiTM Plagiarism Policy.

Plagiarism is passing off the idea or words of someone else as though they were their own. It applies equally to the work of other students or researchers as well as to other published and unpublished sources. Students are responsible for writing their thesis/dissertations in their own words. Quotations from published or unpublished sources and the sources of any other materials should be clearly cited and acknowledged. A systematic style of citation and references according to the chosen style of referencing must be adhered to. Sources of visual presentations such as photographs or maps must also be clearly indicated.

Students are reminded that UiTM takes a serious view on plagiarism. Before submission of the thesis/dissertation, supervisors are required to check the students' work for plagiarism using software recognized by IGS. A copy of the Originality Report produced by the software must be submitted together with the final thesis/dissertation. If the percentage (similarity index) is higher than the acceptable level of Originality Report, students have to revise their work or face action for plagiarism, which may lead to suspension or expulsion from the programme. Reference regarding this should be made to the IGS Academic Rules and Regulations and UiTM Plagiarism policy and guidelines for regulations pertaining to plagiarism.

Upon submission of the thesis/dissertation, students must also insert a signed Author's Declaration page declaring that the work is original and free from plagiarism.

The incorporation of any material which has been submitted earlier to a degree awarding body is also unacceptable.

6.2 How to Avoid Plagiarism

i. Copying

Nothing should be copied without explicit acknowledgement as described below under 'quoting'. This includes copying the work of other students/researchers.

ii. Quoting

Direct quotations (from a book or paper) are entirely acceptable provided that they are referenced properly:

Open and close quotation marks should be used and the sentence(s) is to be italicised. Sources should be provided in the text, using an acceptable citation style such as APA (e.g. Smith, 1986, p. 21). Details of the source should be written in the reference list.

iii. Paraphrasing

A writer paraphrases when he/she puts someone else's idea into his/her own words. Paraphrasing is entirely acceptable provided that it is acknowledged. A general rule for acceptable paraphrasing is that an acknowledgement be made in every paragraph. There are many ways in which such an acknowledgement can be made (e.g. Smith (1996) goes on to argue that or Smith (1996) provides further proof that....).

iv. General Indebtedness

This can be a difficult area. If there is any doubt, students should cite the source. If the whole manner in which a student thinks about an issue is drawn primarily from one source, then the source should be cited. If the ordering of evidence and argument or the organisation of material reflects one particular source, then this should be cited.

6.3 Final Editing

The student is responsible for writing, preparing and submitting the thesis/dissertation within the stipulated time period.

A student should scrutinize his/her thesis/dissertation for consistency throughout the document and be critical of the content, presentation and format. The varying needs of the different disciplines may demand different lengths of thesis/dissertation but students are advised to adhere to the format stipulated by IGS UiTM.

APPENDICES

APPENDIX A: TOTAL OF WORD COUNTS FOR DOCTORAL & MASTERS THESIS

Table A1 : Social Sciences & Humanities (Research)

No	Faculty / Academy / Centre	PhD		Master	
		Min	Max	Min	Max
1	Faculty of Law	80,000	100,000	40,000	50,000

APPENDIX E: CONFIRMATION BY PANEL OF EXAMINERS
E1: MASTER'S PROGRAMME

(2.5 cm from top)

CONFIRMATION BY PANEL OF EXAMINERS (14 point, bold, uppercase)

(2 cm)

(date of viva)

I certify that a Panel of Examiners has met on 15th June 2016 to conduct the final examination of Muhammad Idris Bin Ibrahim on his **Master of Science** thesis entitled "Urban development Policies : Housing for The urban poor In Kuala Lumpur" in accordance with Universiti Teknologi MARA Act 1976 (Akta 173). The Panel of Examiners recommends that the student be awarded the relevant degree. The Panel of Examiners was (3.8 cm) as follows: (2.5 cm)

(2 cm)

Ahmad Hamdan Abdullah, PhD (capitalize each word)
 Professor
 Faculty of Architecture, Planning and Surveying
 Universiti Teknologi MARA
 (Chairman)
 (1 cm)

Siti Norulaini Safuan (capitalize each word)
 Associate Professor
 Faculty of Architecture, Planning and Surveying
 Universiti Teknologi MARA

E2: DOCTORAL PROGRAMME

CONFIRMATION BY PANEL OF EXAMINERS

I certify that a Panel of Examiners has met on 15th June 2016 to conduct the final examination of Muhammad Idris Bin Ibrahim on his **Doctor of Philosophy** thesis entitled "Urban development Policies : Housing for The urban poor In Kuala Lumpur" in accordance with Universiti Teknologi MARA Act 1976 (Akta 173). The Panel of Examiners recommends that the student be awarded the relevant degree. The Panel of Examiners was as follows:

Ahmad Hamdan Abdullah, PhD
Professor
Faculty of Architecture, Planning and Surveying
Universiti Teknologi MARA
(Chairman)

Siti Norulaini Safuan
Associate Professor
Faculty of Architecture, Planning and Surveying
Universiti Teknologi MARA
(Internal Examiner)

Sharifah Fatimadini Agil, PhD
Associate Professor
Faculty of Architecture, Planning and Surveying
Universiti Malaya

The lack of management data and not knowing what level of park quality local authorities are trying to deliver is becoming a growing concern. The problem of urban landscape cannot be solved simply by providing more parks and spending more money on development and management. There is an urgent need for innovation, for better understanding of the current and potential role of the park to meet the needs in modern urban life. Thus, the adoption of a strategic approach is needed to planning and managing that urban landscape to carry out its function and roles. This research aim is to study the factors of park attributes that influence the development, planning and management of successful urban park in Kuala Muda. It specifically studies on Taman Tasik Cini as the sole representative of urban park in the context of Kuala Muda Structure Plan 2020. This research is based on data obtained from a survey questionnaire that polled public attitudes regarding the factors of park attributes based on visitor's perception and Haris's(2008), park success factors. The data was analyzed to evaluate and determine the park attributes and its level of preferences that influence the strategic approach to the planning and management of successful urban park. The research suggested that successful urban park as are linked to the physical and functional qualities of the park; security and comfort; visitors' preferences and needs of the place. The results of the study also suggested that a holistic strategic approach is needed for the local authority to successfully managing the urban park. It is hope that the study can contribute to the improvement of urban park planning and management in Kuala Muda.

(2.5 cm from top)

ACKNOWLEDGEMENT *(14 point, bold, uppercase)*

(2 cm)

Firstly, I wish to thank God for giving me the opportunity to embark on my PhD and for completing this long and challenging journey successfully. My gratitude and thanks go to my supervisor Assoc. Prof. Dr. Zaini Hamzah, and co-supervisor, Assoc. Prof. Dr. Ahmad Saat. Thank you for the support, patience and ideas in assisting me with this project. I also would like to express my gratitude to the staff of the Malaysian Nuclear Agency, especially Dr. Zaharudin Ahmad, Dr. Abdul Kadir Ishak and Mr. Zulkifli Daud for providing the facilities, knowledge and assistance.

My appreciation goes to the Captain and crew members of the KL PAUS who provided the facilities and assistance during sampling. Special thanks to my colleagues and friends for helping me with this project.

Finally, this thesis is dedicated to the loving memory of my very dear late father and mother for the vision and determination to educate me. This piece of victory is dedicated to both of you. Alhamdulillah.

APPENDIX P: BODY OF THESIS/DISSERTATION

CHAPTER ONE
INTRODUCTION

(Chapter Heading, centre, 14 point, bold, uppercase, 1.5 spacing)

(2.5 cm from top)

1.1 Research Background

(Main Heading, flushed left, 12 point, bold, title case / capitalize each words)

(2 cm)

(Numbering start at 1.1 and not 1.0)

(1 cm)

(Indent first line for each paragraph -0.5")

The emergence of industrial separation processes based on membrane gas separation, pervaporation and vapor permeation has widened the scope of membrane applications considerably. Membrane separation techniques are now beginning to play an increasingly important role in many aspects of bioprocessing. Membrane systems offer high performance such as high surface area per unit volume, permselectivity and potential for controlling the level of contact and mixing between separate phases (Charcosset, 2001). Because of these properties, membrane systems are exploited for both upstream and downstream processing in biotechnology.

The bioreactors which fit this description best are membrane bioreactors (Robinson, 2007). Membrane bioreactors are devices in which enzymes, organelles, microbial animal and plant cells are retained by means of membranes for the production of valuable materials, for processes such as wastewater treatment and for analysis as biosensors. Membrane bioreactors using biocatalyst can be used in production, processing and treatment operations. The distinguishes of this membrane bioreactor from other types is the in-situ separation of products from biocatalyst. Additional benefits they offer are to increase cell concentration, able to function at moderate temperature and pressure and reduce the formation of by-products.

(3.8 cm) *(2.5 cm)*

Notes:

- *The first line of all paragraphs should be indented one tab key from the left-hand margin.*
- *The main body text should be left aligned or justified.*
- *In the main body, use 1.5-line spacing.*
- *Leave one line space before a heading.*
- *Do not leave a line between paragraphs Times New Roman typeface should be used.*

1

(2.5 cm from top)

2.1.2 Lagrange Multiplier (LM) Test (Sub-Heading, flushed left, 12 point, bold, title case/capitalize each word)

(1 cm)

The Lagrange Multiplier test (LM) is also called the Autocorrelation Test. In time series analysis, one assumption is that the white noise must be uncorrelated. The LM test is commonly used to assess autocorrelation properties of data series.

(Indent first line for each paragraph -0.5")

(1 cm)

2.1.2.1 Blood Agar (Sub Sub-Heading, italic, flushed left, 12 point, bold, title case / capitalize each word)

(1 cm)

Bacto base agar powder (Oxoid) was suspended in 1L of deionized water. The agar suspension was dissolved in a microwave oven for 6 minutes until a clear suspension was obtained. Then it was sterilized by autoclaving at 121°C for 15 minutes. After sterilization, the agar suspension was cooled until 45°C to 50°C in water bath. Then, 5% sterile defibrinated blood was added into agar and mixed. The agar suspension was poured into sterile Petri dishes. To ensure contamination-free agar plates were obtained, the Petri dishes were left for three days before used.

APPENDIX Q: SAMPLE OF REFERENCES
Q2: IEEE FORMAT

The diagram illustrates the IEEE reference format with the following annotations:

- Section Header:** "REFERENCES" is centered at the top of the list. It is left-aligned, bold, 14-point, and uppercase. It is positioned 2.5 cm from the top of the page.
- Section Header Margin:** The left margin for the "REFERENCES" header is 3.8 cm.
- Section Header Spacing:** There is 1 cm of vertical spacing between the "REFERENCES" header and the first reference entry.
- Reference List:** The list contains eight entries, numbered [1] through [8].
- Reference List Margin:** The left margin for the reference list is 3.8 cm.
- Reference List Spacing:** There is 2.5 cm of vertical spacing between the end of one reference entry and the start of the next.
- Reference List Font and Spacing:** The text of the references is in a font size of 12, Times New Roman, with 1.5 spacing between paragraphs.
- Reference List Paragraph Spacing:** There is no space between paragraphs of text within a reference entry.
